

Name:

Class:

Learning Intention:

I am learning to code a tables game

Success Criteria:

How did I do?

I can create sprites for the game (correct and incorrect)

I can code my sprites to move and bounce

I can code the sprites to move in different directions

I can code sprites to hide when clicked

I can code a scoring system

Extension

I can code sprites to move faster when touching other sprites

I can code sprites to move in random directions

I can make sprites reappear after x seconds

I can code the background to change when wrong sprites are clicked

I can add a narrator and a time limit to the game

Challenge

I can debug (fix) any code that doesn't work

☺ I can do it

☹ Did it a bit but didn't fully get it

☹ Didn't get it at all
