

Name:

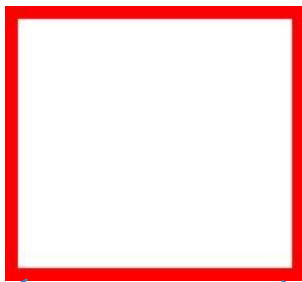

Class:

**Learning Intention:**

**I am learning to code a program that calculates (works out) the perimeter of regular 2D shapes**

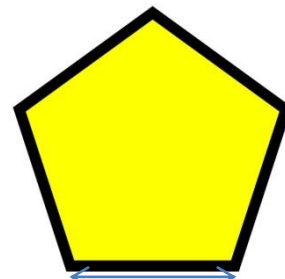

Success Criteria:	How did I do?	
I can create variables		
I can code a program that calculates the perimeter of a square		
I can code a program that calculates the perimeter of a pentagon		
I can code a menu system		
I can test and evaluate my own and other peoples programs		
<b>Extension</b>		
I can code other shapes other than a square and pentagon		
I can code the area of a rectangle		
I can add in code to include the units of measure		
<b>Challenge</b> I can debug (spot and fix) any errors		

- ☺ I can do it
- ☹ Did it a bit but didn't fully get it
- ☹ Didn't get it at all

2cm

Write the length of the perimeter of these regular shapes inside them (*sides are all same length*)

1 cm

(perimeter is the distance round the edge of a 2D shape)
