

archive for all to see even if it is deleted by the user (many sites have much more control over media posted than users realise).

- The site used by friends, cousins and others has been hacked, all usernames and passwords have been stolen and published on the web for everyone to use. (Hacking is a fact of life and major sites such as PlayStation network and many others have had users accounts and credit card info stolen).
- You realise that every photo taken has the location and date of where it was taken tagged into it for everyone to see (many mobile devices do this automatically unless it is disabled).

Class Discussion following activity two

- Did anything cause your group to move a card? What was it and why did you move it?
- Was there any media you chose not to publish anywhere? Why was that?
- Is there anything you would now do differently when publishing media at home yourself? Why is that?

Plenary

Write on a post it note one thing you have learnt from the lesson.

Each card has hidden issues here are some of the ones to be aware of

Photo of a beach with people playing in the sea in the background (people are not fully clothed)

Video of a playpark with children running around and playing on the swings and slides (few parents would be happy with someone videoing their child without permission)

Photo of your family and you next to your parents brand new expensive car (thieves use social media to target possessions for burglary)

Photo of you and your friends in your pyjamas play fighting in your bedroom at a sleep over (Is everyone in the photo fully clothed?)

Video of you dressed up to go to a party at the entrance to your road (If you have the road name in the photo you have given away where you live)

Photo of you and your family playing on the beach in your swimming costumes (semi-nude, body image, permissions to share sensitive photo. If shared while on holiday it might reveal that your home is empty and easy to burgle)

Photo of you coming out of the bath taken by your brother or sister (Illegal to share nude images of children)

Video of you and your friends in your school uniforms walking home from school (Shares where you go to school through the uniform)

Photo of you and in your club (Brownies, Guides, Cubs, Scouts, Boys Brigade etc) uniforms (Shows where you are at certain times of the week)

Photo of you sitting on the toilet (Illegal to share nude images of children)

Video of you at a wedding sipping your parent's wine (Could be used to suggest that your parents are not bringing you up properly)

Photo of someone with one leg longer than the other that you took on your phone in Asda (Was permission gained? Will this be used to poke fun or ridicule this person? It is legal but is it kind?)

Video of someone tripping over when crossing the road (Was permission gained? Will this be used to poke fun or ridicule this person? It is legal but is it kind?)

Video of someone you don't like being punched on the way home from school (If you don't share this with someone in authority, school or the police, you are taking part in the assault, part of the crime)

Video of forest
wildlife

Photo of a beach with
people playing in
the sea in the
background

Video of a playpark
with children running
around and playing on
the swings and slides

Close up photo of you
playing sport in the
local park

Photo of your family
and you next to your
parents brand new
expensive car

Photo of you and your
friends in your pyjamas
play fighting in your
bedroom at a
sleep over

Video of you dressed
up to go to a party
at the entrance to
your road

Photo of you and your
family playing on the

out of the bath taken
by your brother
or sister

Video of you and your friends in your school uniforms walking home from school

Photo of you and in your club (Brownies, Guides, Cubs, Scouts, Boys Brigade etc) uniforms

Photo of you sitting on the toilet

Video of you at a wedding sipping your parent's wine

Video of you being sick

Photo of a dead bird in your garden

Photo of someone with one leg longer than the other that you took on your phone in Asda

Video of someone tripping over when crossing the road

Video of someone you don't like being punched on the way home from school

Class social media group
(Most of your class)

Best friends social media group
(only your best friends)

Share with family face to face

Friends, cousins and others
(A closed group but you don't know everyone)

Family Facebook

You Tube or Public Instagram

Private

(share with no one)

Public

(share with everyone)

Adapted from a problem solving rubric created by Mark Dorling & Thomas Stephens found on <http://code-it.co.uk/attitudes/>

I recognise there is more than one way to solve/describe a problem

I can evaluate my solutions against a set criteria

I can design criteria to evaluate my creations

I can contribute useful ideas to a partner or group

I can encourage others to share their ideas

I lead using all the people talent in my group

I learn from setbacks and don't let them put me off

I can persevere even if the solution is not obvious

I don't just accept the first solution

I look for a range of solution to the same problem

I look for how a project can be extended

I can break complex problems into parts

I can discover / concentrate on the most important part of a problem

I can identify patterns in problems & solutions

I can adapt existing ideas to solve new problems

I can develop, test and debug until a product is refined

I make predictions about what will happen

I repeatedly experiment through predicting, making, testing & debugging

Handles Ambiguity

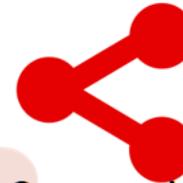

Open Ended Problem Solver

Evaluates

Copes with Complexity
