

When the space key is pressed the **adaptable** triangle procedure will draw three triangles. The number will be added into the procedure to change the length of the sides.

Some everyday procedures can be adaptable (changeable).
 -Brushing your teeth (slow, fast, carefully)
 -Putting your school uniform on (clean, dirty)
 -Dancing your favourite dance (slow, fast)

Adaptable Procedures

Simple procedures are groups of actions that we put together in the same order to do set things.
 -Brushing your teeth
 -Putting your school uniform on
 -Dancing your favourite dance
