

Input

INPUT –How
information goes
into a computer or
device with a
microchip

Example home devices that have microchips

Fridge, Freezer, Oven, Microwave,
some clocks, radio, washing
machine, dryer, dishwasher, DVD
players

Example home devices that have a computer

Laptops, Smart Phones, Satellite
TV boxes, Game consoles

Draw a quick sketch of a device that has a microchip in your home and label how information is input
Don't input any information yourself!
