

Boolean NOT

NOT reverses any condition.

It can be used with any condition

Everyday Boolean NOT If you are NOT hitting your brother you can play outside.

If NOT Condition then action. Action only happens if you are NOT meeting the condition.

NOT works with simple and complex conditions

```
if not touching color red? then  
  say Not touching red
```

If NOT touching colour red then say

Not touching red

The condition is reversed

Programming Examples

If answer typed in is NOT same as 42 then

say Intruder for 2 seconds

The condition is reversed

```
ask What is the secret number? and wait  
if not answer = 42 then  
  say INTRUDER for 2 secs  
  stop all  
say Welcome secret number holder for 2 secs
```
