

Simple Input Roleplay Activity

The first four pages are simple roleplay cards so pupils can work with a partner, one inputting information to start the pupil program the other acting out the action outputs. These are great to use when introducing simple inputs for the first time.

Pupils can swap roles so that the both get to play inputs and outputs.

When head tapped gently

frown

When foot tapped gently

jump forward

jump backwards

When partner raises arm

bow

stretch up

When partner says go

frown

When partner smiles

say love your smile
