

LO Plan your own maths quiz using at least two different question types

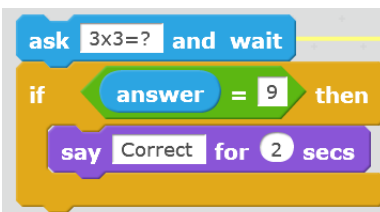

Name _____

Make sure each question connects underneath the last question.

You can choose the maths and what happens when the user gets the question right or wrong.

You can't use the same maths as the examples.

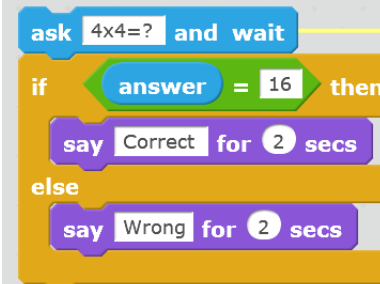

Start Here

```
ask 3x3=? and wait
if answer = 9 then
  say Correct for 2 secs
```

ask 3x3=?
if answer = 9
 say correct

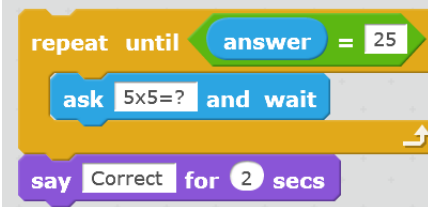

Condition starts action

```
ask 4x4=? and wait
if answer = 16 then
  say Correct for 2 secs
else
  say Wrong for 2 secs
```

ask 4x4=?
if answer = 16
 say correct
else
 say wrong

Condition switches between actions

```
repeat until answer = 25
  ask 5x5=? and wait
  say Correct for 2 secs
```

repeat until answer = 25
 ask 5x5=?
 say correct

Condition stops a repeated action

What character will you use?

What background will you choose?
