Digital devices lesson 4 slide note

	Let's see what you can remember from the last session All digital technology must move All digital technology not just some
	That's right some will, and some will not.
	All digital technology must have a display All digital technology not just some
	That's right some will, and some will not have displays

	All digital technology must have a instructions inside All digital technology not just some
	That's right every digital device will have instructions inside it.
	Do you remember labelling some digital devices in the class two session ago?
	These were the things we were looking for
	We also labelled toys to help us sort them into digital and non-digital last week.

	We were looking for the same things
	So far we know that digital devices come in many shapes and sizes and we should be better at deciding what is a digital device and what is non-digital.
	Now let us look at computers to help us decide if they are digital devices. Before you do why do you think laptops and desktops are named this? Look at the underlined part of the word to help you.
	Teacher Note *You could also include a tablet PC at the same time*
	Has it got power?

	Yes, they both do
	Has it got a display?
	Yes, they both do
	Has it got inputs? Things that put in information into the computer such as buttons, knobs, dials, keys?
	Yes, they both do

	Can we input information by speaking to it?
	Yes, we can if we use a microphone
	Does it do something such as move, light up or make sounds?
	Yes, it does some of these.
	*Teacher Note* *Hand out the labelling sheet so pupils can label the parts of a laptop, desktop and tablet* *You might want pupils to physically label some computers instead*
